

Domestic Cleaning Policy

It is the aim of the practice to maintain high standards of cleanliness, to comply with the requirement of HTM 01-05 and the Code of Practice and to minimise the risk of associated healthcare infections. Our goal is to always provide a safe environment for service users, the practice team, visitors and subcontractors.

The practice has adopted and implemented procedures to maintain the expected level of cleanliness in relation to:

- Premises occupied for the purpose of the providing dental services to service users
- Equipment and reusable medical devices used for the purpose of treating service users
- Materials used in the treatment of service users where such materials are at risk of being contaminated with a health care associated infection

For domestic cleaning procedures refer to the relevant section of Infection Prevention Procedures (M 257B).

Descaling procedure

As the practice is a hard water area we descale all taps and water using appliances on a monthly basis.

For our risk assessment, domestic cleaning plan and audit see Domestic Cleaning for a Dental Practice (M 257I).
